1. Includes mosquito surveillance data from Cook County Department of Public Health, Skokie Department of Public Health, Evanston Department of Public Health, North West Mosquito Abatement District, North Shore Mosquito Abatement District, Des Plaines Valley Mosquito Abatement District, South Cook County Mosquito Abatement District, and the Illinois Department of Public Health.

2. Barrington, Berkeley, Brookfield, Buffalo Grove, Cicero, Des Plaines, Elk Grove Village, Evanston, Evergreen Park, Franklin Park, Glenview, Harwood Heights, Homewood, Justice, La Grange, Lincolnwood, Niles, Northbrook, Oak Park, Palos Hills, Richton Park, Rolling Meadows, Schaumburg, Skokie, Tinley Park, Wheeling, and Willow Springs.

Dead Birds: Nineteen birds have been submitted for testing. One bird has tested positive, collected in Palos Heights, and sixteen birds have tested negative. Two birds were not able to be tested.

Human Cases: Seven cases of WNV infection in humans have been reported.

Risk Assessment

There is a **high risk** of human West Nile Virus infection at this time.

Prevention: When outdoors between dusk and dawn, cover skin with lightly colored loose fitting clothing and use mosquito repellent with DEET, picaridin or oil of lemon eucalyptus. When applying repellent, always follow the directions on the product label. Get rid of standing water around your home in pet bowls, flower pots, old tires, baby pools and toys. Water that is allowed to stagnate for three or four days becomes a breeding ground for mosquitoes. Make sure your doors and windows have tightly fitting screens and repair any tears or other openings. Keep weeds and grass cut short and keep gutters clean and free of debris.

Disclaimer: All data are preliminary and may change as more reports are received.
