3. Alsip, Evanston, Evergreen Park, Forest Park, Hillside, Hodgkins, Oak Park, Skokie, and Wheeling.

**Dead Birds:** Twenty-eight birds have been submitted for testing. Twenty-five birds have tested negative and three are pending results.

**Human Cases:** There are no reported cases of WNV infection in humans.

### **Risk Assessment**

There is a **low** risk of human West Nile Virus infection at this time.

**Prevention:** When outdoors between dusk and dawn, cover skin with lightly colored loose fitting clothing and use mosquito repellent with DEET, picaridin or oil of lemon eucalyptus. When applying repellent, always follow the directions on the product label. Get rid of standing water around your home in pet bowls, flower pots, old tires, baby pools and toys. Water that is allowed to stagnate for three or four days becomes a breeding ground for mosquitoes. Make sure your doors and windows have tightly fitting screens and repair any tears or other openings. Keep weeds and grass cut short and keep gutters clean and free of debris.

**Disclaimer:** All data are preliminary and may change as more reports are received.
