Section IV: Proper Assignment of Disposition Codes;	TABLE IV.01. Household Roster Status, By Assigned Month Base = Records With Final Disposition Codes of 110 to 260 (Should Have Only Consistent Household Roster)	28
	TABLE IV.02. Household Roster Status, By Assigned Month Base = Records With Final Disposition Codes of 270 or 280 (Should Have No or Partial Household Roster)	29
	TABLE IV.03. Household Roster Status, By Assigned Month Base = Records With Final Disposition Codes of 305 to 450 (Should Have No Household Roster)	30
	TABLE IV.04. Number of Attempts, By Assigned Month Base = Records With Final Disposition Codes of 315,332,325,340,345,350,360,365 (Should 15+ Attempts)	31
Section V: Unit Nonresponse;	TABLE V.01. Resolution Rate, Screening Completion Rate, Interview Completion Rate, Cooperation Rate, Overall Response Rate, CASRO Rate, Year-to-Date for Each Assigned Month, Base = All Records	32
	TABLE V.02. Percent With Known Eligible Households Base = All Probable Eligible Households and Known Eligible Households (Records with Final Disposition Codes of 110-355,370)	33
	TABLE V.03. Percent With Selected Respondent, By File Month Base = Eligible Households (Records with Final Disposition Codes of 110-280)	34
	TABLE V.04. Percent Began Interview, By File Month, Base = Households with Selected Respondent (Records with Final Disposition Codes of 110-260)	35
	TABLE V.05. Percent Complete or Partial Complete, By File Month, Base = Households with Begun Interview (Records with Final Disposition Codes of 110-210)	36
	TABLE V.06. Percent Complete, By File Month, Base = Completes or Partial Completes (Records with Final Disposition Codes of 110-120)	37
Section VI: Item Nonresponse;	TABLE VI.01. Income (77 and 99 Collapsed), Year-to-Date, Base = Completes Only	38
	TABLE VI.02. Income (77 and 99 Collapsed), By File Month, Base = Men Only	39
	TABLE VI.03. Income (77 and 99 Collapsed), By File Month, Base = Women Only	40
Section VII: Household Rosters, Number of Adults, and Number of Phones;	TABLE VII.01. Household Roster Status, By Assigned Month Base = Records With Partial or Complete Household Rosters	41
	TABLE VII.02. Number of Adults, By Assigned Month Base = Records With Non-Missing Number of Adults	42
	TABLE VII.03. Number of Phones, By Assigned Month, Base = Completes Only	43
	TABLE VII.04. Number of Phones, By Number of Adults, Base = Completes Only	44
Section VIII: Recruitment, Retention, and Assignment of Interviewers;	TABLE VIII.01. Number of Interviewers by Number of Months Interviewer Working, Year-to-Date Base = All Records	45
	TABLE VIII.02. Recruitment and Retention of Interviewers, by Assigned Month Base = All Records	46
Section IX: Interviewer Outliers - A: Bias;	TABLE IX.01. Outliers, By Interviewer ID Base = Completes Only	47
	TABLE IX.02. Outliers, By Interviewer ID Base = Women Only	50
	TABLE IX.03. Outliers, By Interviewer ID Base = Men Only	51

Definitions of Variables

Assigned Month.

BRFSS protocol calls for states to submit related pre-screened sample records that they never called along with sample records that they did call. Sometimes states fail to do so. For states that receive their sample through BSB, we are able to identify related pre-screened records they may have failed to send and to add them to their data files. Assigned month is the month of the file in which a record was submitted or the month of the file in which a related pre-screened record should have been submitted but was not.

File Month.

Each data file submitted to CDC contains the name of a month in the filename. The file month of a record is month of the file in which it was submitted.

Household Roster Status.

None=Number of adults, number of men, number of women are all missing.

Partial=One or two of number of adults, number of men, number of women are missing.

Inconsistent (But Complete)=Number of adults, number of men, number of women are all non-missing but number of adults does not equal the sum of number of men and number of women.

Consistent (And Complete)=Number of adults, number of men, number of women are all non-missing and number of adults equals the sum of number of men and number of women.

Number of Residential Telephone Numbers.

Missing="Do you have more than one telephone number in your household?" or "How many residential telephone numbers do you have?" was refused. Otherwise, the reported number of residential telephone numbers.

Density Status.

Categorized as Listed, Not listed one-plus block, or Zero block.

COMMUNITIES PUTTING PREVENTION TO WORK USING BEHAVIORAL RISK FACTOR SURVEILLANCE SYSTEM, DATA QUALITY REPORT FOR COOK COUNTY, IL, 2010
2010 Final Disposition Codes

	Disposition Codes	Description
1		Interview
	110	Complete
	120	Partial Complete
2		Eligible, Non-Interview
	210	Termination within questionnaire
	220	Refusal after respondent selection
	230	Selected respondent never reached or was reached but did not begin interview during interviewing period
	240	Selected respondent away from residence during the entire interviewing period
	250	Language problem after respondent selection
	260	Selected respondent physically or mentally unable to complete an interview during the entire interviewing period
	270	Hang up or termination after number of adults recorded but before respondent selection
	280	Household contact after number of adults recorded but before respondent selection
3		Unknown Eligibility, Non-Interview
	305	Household members away from residence during entire interviewing period
	310	Hang-up or termination, housing unit, unknown if eligible respondent
	315	Household contact, eligibility undetermined
	320	Language problem before respondent selection
	325	Physical or mental impairment before respondent selection
	330	Hang-up or termination, unknown if private residence
	335	Telephone answering device, message confirms private residential status
	340	Telecommunication technological barrier, message confirms private residential status
	345	Telephone answering device, not sure if private residence
	350	Telecommunication technological barrier, not sure if private residence
	355	Telephone number is no longer in service or has been changed
	360	No answer
	365	Busy
	370	On never call list
4		Not Eligible
	410	Household, no eligible respondent
	420	Not a private residence
	430	Dedicated fax/data/modem line with no human contact
	440	Fast busy
	450	Non-working/disconnected number

COMMUNITIES PUTTING PREVENTION TO WORK USING BEHAVIORAL RISK FACTOR SURVEILLANCE SYSTEM, DATA QUALITY REPORT FOR COOK COUNTY, IL, 2010

Definitions and Labels for Disposition Code Categories

In the Tables Below, These Disposition Codes are Categorized as Follows:

Category	Disposition Code(s)	Format in Tables
Completed Interview	110, 120	Completed Interview
Eligible Household, Incomplete	210, 220, 230, 240, 250, 260, 270, 280	Elig HH
Household or Probable Household, Eligibility Unknown	305, 310, 315, 320, 325, 330, 332, 335, 340, 345, 350, 355, 370	HH or Prob HH, Elig Unkn
Household, No Eligible Respondent	410	HH, No Elig Resp
Household	110, 120, 210, 220, 230, 240, 250, 260, 270, 280, 305, 310, 315, 320, 325, 330, 332, 335, 340, 345, 350, 355, 370, 410	HH
Non-Contact	360, 365	Non-Contact
Non-Household	405, 420, 430, 440, 450	Non-HH

Explanations of Stem-and-Leaf Displays and Box-Plots

Stem-and-leaf displays and boxplots allow the examination of a distribution for the purpose of identifying extreme values, or outliers. Stem-and-leaf displays and boxplots are found in the output of Section IX.

In a stem-and-leaf display, the first column of numbers is the stem. In these tables, the stem usually represents a whole percentage number. The second sets of numbers are the leaves. Each observation is represented by one digit (leaf). In these tables, the leaves usually represent rounded tenths of a percent. As a whole, a stem-and-leaf can be thought of as a vertical histogram in that the lengths of the leaves are proportional to the relative frequencies in an interval. Immediately to the right of the stem-and-leaf display proper is a column showing the number of observations in each interval. Observations toward the ends of a distribution that are separated from other observations by one or more blank intervals are candidates to be considered as outliers.

A box plot provides a more formal statistical approach to identifying outliers. "The bottom and top edges of the box correspond to the sample 25th (Q1) and 75th (Q3) percentiles. The box length is one interquartile range (Q3-Q1). The center horizontal line with asterisk endpoints corresponds to the sample median. The central plus sign (+) corresponds to the sample mean. If the mean and median are equal, the plus sign falls on the line inside the box. The vertical lines that project out from the box, called whiskers, extend as far as the data extend, up to a distance of 1.5 interquartile ranges. Values farther away are potential outliers. The procedure identifies the extreme values with a zero or an asterisk (*). If zero appears, the value is between 1.5 and 3 interquartile ranges from the top or bottom edge of the box. If an asterisk appears, the value is more extreme." (SAS Institute Inc., SAS Procedures Guide, Version 8, Cary, NC: SAS Institute Inc., 1999. 1643 pp. Page 1389.)
