Data collected Spring 2014

Introduction

Based on the administration of the Illinois Youth Survey (2014), this report provides county-level data on a variety of health and social indicators such as drug use, bullying, and school climate. The data has been organized into topical sections as noted in the table of contents following this introduction. In most cases, only a portion of schools in a county participate in the Illinois Youth Survey (IYS). There will be NO DATA presented in this report for any grade level with only one district reporting. This is to protect the confidentiality of district-level results.

The IYS is offered to both public and private schools. In order to have the best understanding of how well the results in this report reflect the experiences of the youth in this county, several factors should be considered including: Public School Building Participation, Public School Student Participation, and Private School Student Participation.

Public School Building Participation

In Table 1, the number of eligible public schools (i.e. contain at least 15 students at the 6th, 8th, 10th or 12th grade level) is compared with the actual number of IYS participating public schools in the county.

Table 1: Public School Building IYS Participation by School Level

Elementary & Middle Schools (6th and/or 8th grades)		High Schools (10th and/or 12th grades)	
N Schools Participating	N Schools Eligible	N Schools Participating	N Schools Eligible
67	283	35	73

Public School Student Participation

Table 2 provides a comparison between the actual number of students surveyed and the number of all students enrolled in public schools within the county. This percentage can be increased by surveying more schools and students within the county. Again, enrollment totals are based on student enrollment at public schools with at least 15 enrolled students at the 6th, 8th, 10th or 12th grade level. Table 2 is based solely on public school students due to the lack of available enrollment information for private schools.

Table 2: Public School Student IYS Participation by Grade

	N Student Surveyed	N Enrolled Students in County	% Enrolled Students in County Report
6th	4872	28307	17%
8th	5235	27999	19%
10th	13045	30197	43%
12th	10479	27329	38%
Total	33631	113832	30%

Private School Student Participation

Table 3 provides a count of the number of private school students surveyed in this county. Note that the data presented in this report includes both public and private schools that participated in this county.

Table 3: Number of Private School Students Surveyed by Grade

6th	8th	10th	12th	Total
46	47	944	837	1874

If schools that serve youth in specialized settings like charter schools, alternative schools, etc. participated in the IYS, these students are represented in the survey results but are not included in data summaries presented in Table 2 or

Table 3 above.

Organization of the Report (Data Tables and Charts)

Tables can be helpful when you are looking for a summary of responses for particular survey questions, for example, the percentage of 8th grade youth who report using prescription pain killers to get high. Some tables may contain a mean score (an average of all the responses), a median score (the middle point of all responses given) or an “N” (number of students who responded to that question). Tables can also be useful when you need specific data to support a grant or report. If you see an “N/A” (Not Applicable) noted in a table, this indicates that the question was not asked at that grade level. If you see an “N/R” (Not Reported) noted in a table, this indicates that at least 90% of students skipped the question for no known reason, making the results too biased to report.

Summary charts can be helpful to view multiple questions in one place (e.g., use of different drugs to determine which is the most used) and to compare your results with the scientific sample of Illinois students who participated in the 2012 IYS. State level results from the 2014 IYS will not be available until late fall. IYS state level norms from 2012 are a good benchmark for immediate decision-making because state estimates stay relatively stable across two IYS administration years. To locate the starting page of the Summary Charts, refer to the Table of Contents on the next page.

Keep in mind that the IYS 6th and 8th grade forms do not include all questions asked on the IYS high school form. For that reason, responses to some questions do not appear in the tables and charts for some grade levels. If you would like to determine what section includes responses to a specific survey item or verify if a question was asked at a specific grade level, please refer to the Site Report Appendix on our website <http://iys.cprd.illinois.edu/home/results>.

We are confident that you will find this report to be a valuable resource for planning, grant writing, program development and reporting. If you have any questions about this report, please call 888-333-5612 and ask for an IYS Coordinator or visit the IYS website at <http://iys.cprd.illinois.edu/>.

Summary Charts

Summary charts provide a snapshot of selected health and social indicators. All charts provide grade-level data. Some charts illustrate comparisons between one grade level of *Your Students in 2014* with the same grade level in a statewide random sample of *Illinois Students in 2012* (as noted in the introduction to your report). Other charts provide a comparison of *Your Students in 2014* across all grades surveyed to easily surface developmental trends. *Please note that there was no 6th grade state sample in 2012, therefore no charts will display 2012 state data for 6th graders.*

Your report may not contain the full array of charts listed below. As noted in the introduction to your report, there will be NO DATA presented in this report for any grade level with **fewer than 10 valid surveys** in order to protect the confidentiality of your students. In addition, the IYS 6th and 8th grade forms contain a subset of the questions asked on the IYS high school form. As a result, some of the charts listed below may not be included in your report. Information about the availability of grade-specific charts or data is defined for each chart below. If an item within a chart is not displayed for a grade level (most often 6th and 8th grades), a footnote is included on the chart to explain.
