

Water Testing Labs & Organizations (updated 1-22-2024)

For any water testing questions, test considerations or result review, feel free to give us a call at 847-818-2841.

Important notes about this list: This list is not an endorsement from Cook County Dept. of Public Health; it was made to be a convenient list to our residents. Not all of the labs listed here are EPA certified in all of their test offerings, some tests are screenings, some only offer a few tests, and some offer mail in kits. If you have specific questions about test offerings, submission to or need a result to meet a criterion, please go to their website or call the lab. Labs that offer a full suite of EPA certified water testing offerings have an *, such as needed for non-community water testing.

Cook County Dept. of Public Health
2121 Euclid Ave., Room 250
Rolling Meadows, IL 60008
