COMMUNITIES**

Water Testing Labs & Organizations (updated 6-16-2025)

For general well water concerns, test considerations or result review, feel free to give us a call at 847-818-2841.

Important notes about this list: This list is not an endorsement from Cook County Dept. of Public Health; it was made to be a convenient list for our residents. Not all of the labs listed here are EPA certified in all of their test offerings, some tests are screenings, some labs only offer a few tests, and some labs offer mail in kits while others are drop-off only. If you have specific questions, please go to the lab website or call. Labs that offer a full suite of EPA certified water testing offerings have an *, such as would be needed for non-community water testing.

Barrington Area Council of Governments (BACOG) – not a lab and is only for residents of Barrington, Barrington Hills, Deer Park, Lake Barrington, South Barrington, Tower Lakes and the Township of Barrington – they occasionally offer water testing events, water testing info and groundwater info.
